

# Kitty

Model & Diagrams  
Jens Kober, 2011/2014/2016

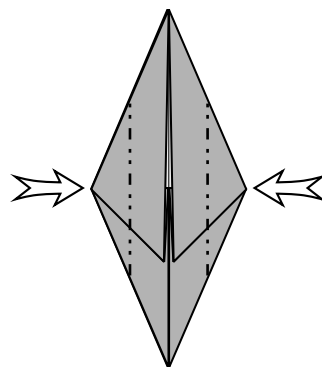

Use a 10x10cm paper for a 8.6cm long cat.

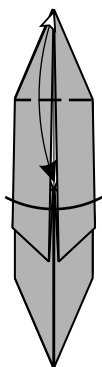

1. Start with the main color down.  
Fold a fish base.

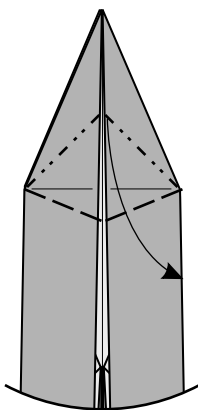

2. Fold and unfold both corners to the center parallel to the diagonal.

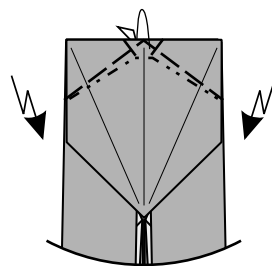

3. Open sink both corners.

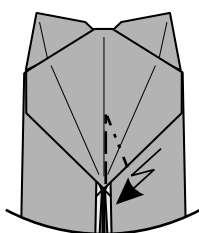

4. Fold and unfold the head.  
Enlarged view of the head.

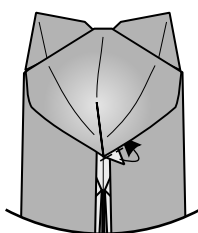

5. Fold the head back down pulling out some paper to align the sides with the edges behind.

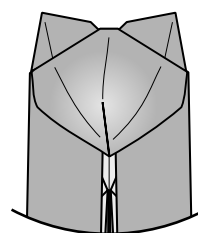

6. Pleat the ears and fold the center behind. *Optional:* change the pleats to crimps and sink the center.

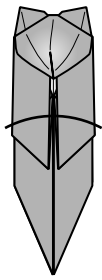

7. Make the head 3D by folding the tip behind.

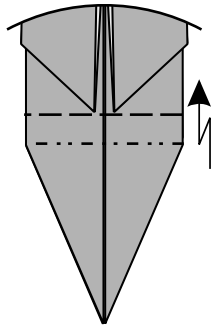

8. Valley fold the tip below the face to lock the 3D shape.

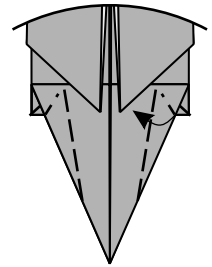

9. Back to original view.

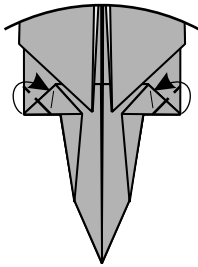

**10.** Enlarged view of the tail.

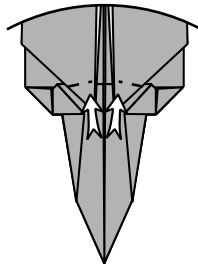

**11.** Pleat the tail.

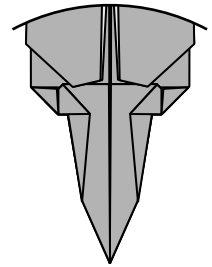

**12.** Narrow the tail with swivel folds.  
Enlarged view.

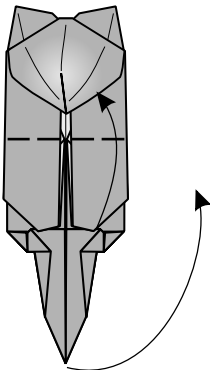

**13.** Round the behind with valley folds.

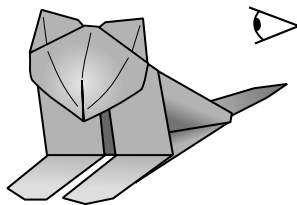

**14.** Round the paws with inside reverse folds.

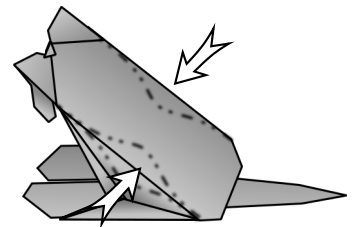

**15.** Back to original view.

**16.** Fold the legs up, the tail behind,  
and straighten the back.

**17.** Side view.

**18.** Push the sides of the body in and  
shape to taste
