

Torch

Model & Diagrams
Jens Kober, 2012

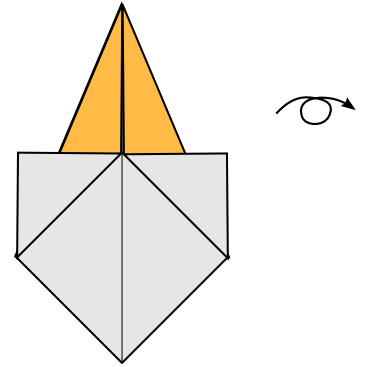

Use a silver and orange paper.

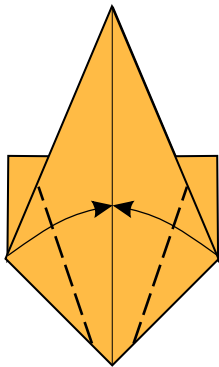

1. Start with the silver side up. Fold a kite base.

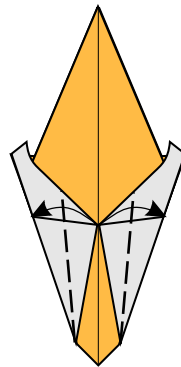

2. Fold the two corners up again at 45° such that their top edge forms a straight line.

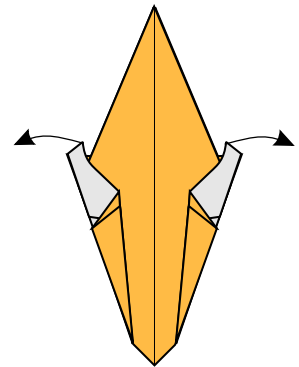

3. Turn over.

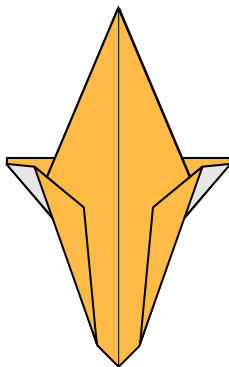

4. Fold such that the corner ends up on the center line. Do not fold the bottom layer. The model will not be flat.

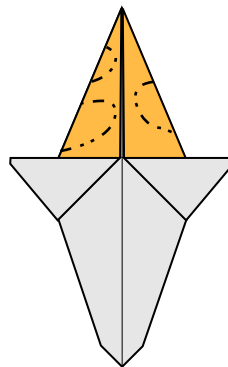

5. Fold back over such that the edges line up.

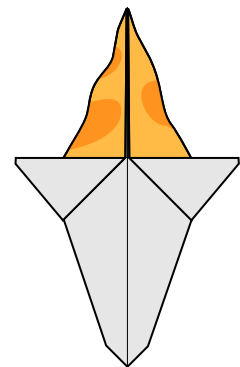

6. Pull at the corners to free some trapped paper. Now the model should be flat.

7. Turn over.

8. Shape the flame.

9. Done.
